Choice New GLADS

MOTHER ANNE

C. & G. MELK

7731 W. Appleton Ave.
MILWAUKEE 16, WIS.

DEAR GLAD FRIEND:

Once again it is Catalog time and we are glad to send you our 1954 edition.

We wish to thank all of our customers for their business in past years and hope that we will have the pleasure of serving you in 1954.

If you have never ordered from us, may we suggest a trial order. We feel sure that you will be pleased with the quality of our stock.. We are introducing three new varieties for 1954, namely: Celestial Rose, Fortune, and Mother Anne. We consider these to be valuable additions to their respective color classes for show purposes as well as promising commercial varieties. We have selected them for their bright, clear colors and good growing habits along with other good qualities.

Our 1953 introductions were well received. Margery, a very beautiful cerise rose won a Grand Championship in its introductory year. Red Radiance, a very bright light red is most promising for commercial growing and also for the show table.

Our other introductions; Honey, Pink Classic, Skippy and Golden Crown are now down in price so that everyone can enjoy them.

In List No. 1 we offer a selection of Recent Introductions at Prepaid prices.

List No. 2 consists of varieties introduced prior to 1951. These quotations are at Wholesale F. O. B. prices.

In our descriptions the number following the name of the variety is the N. A. G. C. class number. This is followed by the name of the Originator or Introducer and the year of introduction. The last number is the approximate number of days to bloom from large bulbs. Very early planting or smaller sizes of bulbs will require additional time.

BUSINESS TERMS

Prices are for Cash with Order or 25% Deposit to hold an order, balance before shipment or C. O. D.

All quotations are subject to prior sale.

Orders are filled with clean healthy stock, true to name and up to size. However, if error should occur, we will endeavor to make satisfactory adjustment either by replacement of stock or refund of the purchase price.

Stock is state inspected in the field and in storage. Certificate No. 597.

Shipment can be made either by Parcel Post or Express. If your order consists of both prepaid and F. O. B. items we will ship the entire order Express Collect and add extra bulbs to offset the shipping charges on the prepaid items.

Substitution: We do not substitute variety without permission. If out of size ordered we will substitute with next size larger or smaller to the amount of money sent. If you do not want us to substitute size, please advise.

NEW for 1954 . .

CELESTIAL ROSE (462)

(Seedling No. 48 - 10)
(Tivoli x Burma)

GLISTENING clear light rose blending to a white throat. A very beautiful color. Opens 8 5" blooms with 6 buds in color on a 21 bud spike. Florets are beautifully formed and nicely ruffled. Attachment is good and the formal placement is near perfection. Flowerhead 27", height 58", blooms in 85 days.

Celestial Rose is an easy grower that consistently produces good spikes. Should be tops as a commercial and a fine show glad also.

This variety makes fine looking healthy bulbs and propagation and germination are both good.

FORTUNE (422)

(Seedling No. 48 - 151)
(Orange Gold x Spotlight)

BRIGHT clear golden orange without blotch or markings. Color about mid-way between Orange Gold and Patrol. The 4½" florets have slightly rolled back petals, giving it a needle point effect. Opens 6 to 7 with 6 additional buds in color on a well balanced spike of 19 buds. Attachment is good and florets and buds are nicely spaced on a stretchy flowerhead of 25". Field height 58".

Blooms in approximately 80 days. Fortune should prove to be a valuable addition to the orange class because of its bright glowing color and dependable growing habits. Makes well proportioned spikes even from small bulbs.

Produces extra fine bulbs and is a good propagator and germinator.

MOTHER ANNE (466)

(Seedling No. 47 - 131)
(Pink Radiance x Hoosier Lady)

MEDIUM rose - lavender blending to a small cream throat. The 4¾" florets are rather deep and nicely ruffled. Informal placement. Opens 7 to 8 on a well balanced spike of 21 buds. Six additional buds in color. Flowerhead 28", height 56", blooms in about 75 days.

We feel sure that this variety will prove to be an extra fine early cut flower. It has a distinctive color that holds up well as florets open up the spike. Plants are short so the tall spikes are easy to cut. Attachment, placement, and spacing are all that could be desired.

Our 1953 Introductions

M A R G E R Y (462)

Grand Champion at the Grants Pass Glad Show in 1953

One of the very few 1953 introductions to win this award.

M A R G E R Y

M A R G E R Y is a brilliant cerise rose with a deeper rose throat. Its color has a sparkle and luster that must be seen to be appreciated. Here is a real commercial in just the color the florists are looking for.

Its field performance is tops, spikes are tall, straight and uniform and are easy to cut with good stem length.

Florets are 5" in diameter slightly ruffled with perfect placement and firm attachment. Margery has the ability to open when cut in bud. Flor-

ets open progressively and will hold 8 or more open with most of the remaining buds showing color.

Under ordinary field culture the spikes will average 21 buds with a 26" flowerhead and a field height of 58". Foliage is deep green and healthy. Margery produces high crowned and healthy bulbs. Bulblets are of average size and germinate easily. Propagation is good. Blooms in about 70 days.

Margery has an outstanding show record. Under average culture and with but a limited number of bulbs it won the American Home Achievement Award at the Wisconsin Glad Society Show at Two Rivers in 1951. Also best single, three spike and basket Seedling Award and Reserve Champ at this same show. In addition it won other single, three spike and Basket Seedling Awards at other Wisconsin shows.

Its winnings include four Trophies, 2 N.A.G.C. Medals plus many Rosettes and Blue Ribbons.

RED RADIANCE (450)

RED RADIANCE is a very bright and clear light red without blotch or markings. A self color. It will open 8-10 well placed florets 5" to 5½" diameter, with 6 buds in color on a spike of 20 or more buds.

Red Radiance has inherited all the dependability of Red Charm, the seed parent, but its color is the brightest real red we have seen in Glads.

It grows very tall like its other parent Spotlight and like the latter it opens extra well in water and it is a good shipper.

Florets are of smooth velvety texture and do not bruise or crush easily. In last year's catalog we described Red Radiance as having 8 florets open. This past season with more large bulbs available we had spikes with an even dozen florets open and the lower ones still in good condition.

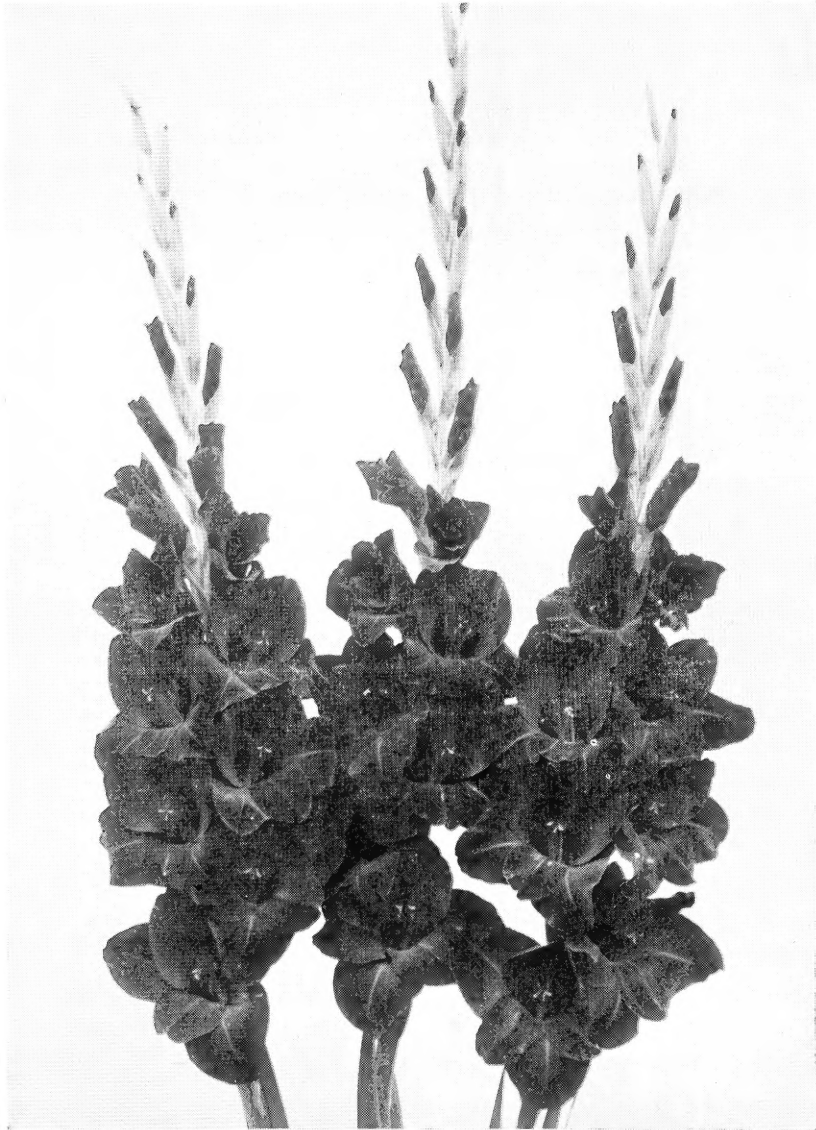

Spikes are strong and stand up straight in the field. The plants are wide leaved and of medium height, making it an easy cutter.

The stems on the cut spikes are hard and firm, ideal for floral use.

In addition to its other good qualities, Red Radiance has the ability to make fine tall spikes in hot weather, a quality that is of much value to the commercial grower. Red Radiance makes sound healthy bulbs, and it is a rapid propagator. Blooms in about 85 days.

RED RADIANCE

HONEY (340) Melk '51 (80) Beautiful clean light pink blending to a white throat. Very fine color. The ruffled 4" round florets are well placed and firmly attached on a willowy spike of 16 to 18 buds. 5 florets open 4 buds in color.

Height 48 in. Flowerhead 20 in.

This variety makes healthy plants and bulbs and it is a good propagator, Honey is an excellent glad to use in vases and table decorations where its high color value shows to full advantage. Not a large glad but certainly one of the most beautiful.

PINK CLASSIC (540) Melk '51 (82) This geranium pink has heavily ruffled and fluted florets 5½" diameter. The blooms are perfectly placed and firmly attached on very tall and strong spikes of 20 or more buds, 8 florets open and 8 more buds showing color. Flowerhead and stem are in good proportion. Spikes are easy to cut. Plants are strong, holding the spikes upright even during adverse weather. Rapid propagator and the bulblets germinate easily.

A fine commercial and exhibition glad.

SKIPPY (401) Melk '51 (75) Heavily ruffled white with small pink feather. 4½" blooms of heavy substance, 6 open 4 buds in color on a tall spike of 18 buds. Height 50". Flowerhead 24". Blooms in 75 days. Skippy should prove to be a good cut flower as it makes tall stretchy spikes that do not crook and have excellent placement and firm attachment. An all around, good variety that is well liked by all who see it.

GOLDEN CROWN (412) Melk '50 (80) Golden Crown is very consistent in the production of good commercial spikes. The color is a clean medium deep yellow without markings, opens 6 blooms 5" in diameter on a spike of 20 buds, has a flowerhead of 24" and a field height of 55". Placement is not always good but the florists like its color and opening qualities, which makes it a profitable variety to grow.
